Isbell's

DESCRIPTION

Early Blood Turnip—Good for early or late. Camelot

Early Jersey Wakefield—The best early variety we have tested, produces large, solid heads.

Danish Baldhead—One of the best late cabbages.

LETTUCE
Deacon Head—Heads are large, keep in eating order for a long time.

SQUASH

Delicious—A winter variety, medium size, finest quality of any we have tried.

Hubbard—Old reliable sort.

ONIONS

Red Globe Onion Seed—Medium size, sure producer.

Yellow Danvers—One of the leading varieties.

WATERMELON
Kleckley's Sweet—Large, fine quality.

Ice Cream—Early.

PARSNIP

Improved Hollow Crown—None better.

Nott's Excelsior—Early blue wrinkled.

Premium Gem—Medium early.

Telephant—Pods and peas both large, quality fine.

RADISH

Early Scarlet Turnip—One of the best varieties grown.

Early White Box—Fine quality.

French Breakfast—White tipped, makes quick growth.

TOMATOES

Isbell's Earlibell—Best early tomato we have tried, very smooth and productive.

MUSKMELLON

Early Hackensack—Large, fine quality, green fleshed.

Osage—Good market variety, yellow fleshed. SWEET CORN

Harris Early—One of the best early varieties I have tested. Prolific and sweet.

Evergreen—The old reliable for late use. FIELD SEEDS

Oats Sensation—Oats have been growing this variety for 18 years. Has given us good satisfaction both in yield and standing up well. I will have some seed corn—Minnesota No, 15 Early. Early good size, grown in central Minnesota.

Golden Glow—A good medium early variety. Whitecap Yellow Dent—These 3 varieties good for husking.

I will also have good silage corn of both red clover and alfalfa dent, and some good Michigan grown corn.

POTATOES

Early Ohio—Write for prices.

BUCKWHEAT

Silverbull, Japanese and Millet—At market prices.

All varieties seed tested for germination which makes them more valuable to purchaser.

GRASS SEEDS

Alskle—Has played more than twice as many seeds in a pound as medium or mammoth clovers. Therefore sow half the quantity. Where ground is wet or sour Alskle will do better than medium clover. Where conditions are right Alskle will thrive and the proper bacteria are in the soil, one can mix alfalfa seed with other seeding on wheat ground in the spring; also with oats or barley with very satisfactory results.

Farmers, sow more alfalfa. I do not handle foreign grown alfalfa or clover seed.

ORCHID GRASS

The great pasture, grass once established will remain in the soil for many years. Will come the first of annual grasses in the spring; also grown right through the season, when some other grasses are drying up. I handle alfalfa, medium mammoth and alskle clover and all kinds of field seeds. I handle the best grades of Vargiled has I can buy, and sell at reasonable prices.

I handle Northwestern grown alfalfa, Idaho, some Montana. Can get Grimm, or Canadian varigated seed, if farmers give me time to order it before they want to sow it.
